ABSTRACT:

PURPOSE: To quickly process a petty <u>loan</u> with high efficiency via a cash dispenser by reading intrinsic data on a customer <u>recorded on a card</u> medium and then recording the data on a transaction-enable state if obtained on the card medium.

CONSTITUTION: When a customer puts a <u>card</u> medium 1 into a reading means 2, the data intrinsic to the customer are read by the reading means 2. Then the <u>loan</u> transaction data is supplied through an operation input means 3 and a deciding means 4 decides the propriety of a transaction based on said read-out data and the <u>loan</u> transaction data. If the transaction is possible, the data showing a transaction-enable state is <u>recorded</u> on the medium 1. Then the customer puts such a <u>card</u> medium 1 into the cash dispeuser, etc. to receive a loan.
